

Koen Schreij

koenschreij@gmail.com | (973) 641-3401 | KoenSchreij.com | Naples, FL | Willing to Relocate

Professional Summary

Electrical Engineering Technology graduate (4.0 GPA) with nearly a decade of managerial experience delivering results at the intersection of engineering, automation, and operations. Combines hands-on expertise in electronics controls with proven leadership in resource management, process optimization, and cross-functional coordination. Known for translating technical knowledge into practical solutions that improve reliability, efficiency, and operational performance.

Core Competencies

- Circuit Design & Analysis
- PCB Design & Fabrication
- PLC Programming & Automation
- Microcontroller Programming (C/C++)
- Project Management & Leadership
- Rapid Prototyping & 3D Modeling
- Root Cause Analysis & Troubleshooting
- Technical Documentation & Reporting

Education

Bachelor of Science in Electrical Engineering Technology (Concentration in Electronics)

Excelsior University, Albany, New York | Graduated: May 2026 | 4.0 GPA

Associate Degree in Leisure & Hospitality

DaVinci College, Dordrecht, The Netherlands | Graduated: 2012

Relevant Technical Projects

Wellness Guardian (Capstone Project)

End-to-End Design & Fabrication | Spring 2026

- Engineered an embedded hardware system that gamifies health by linking real-world movement metrics (steps and calories) to the growth of a virtual pet.
- Managed the complete project lifecycle, from constructing the initial breadboard prototype to designing and routing a custom PCB.
- Designed and fabricated a final custom 3D-printed enclosure to integrate and protect the hardware components.

Power Electronics System Design

Academic Group Project | Fall 2025

- Collaborated with a team to engineer an AC-DC rectifier, DC-DC buck converter, and DC-AC inverter, meeting strict voltage and ripple specifications.
- Conducted circuit simulations to validate performance and efficiency.

Professional Experience

Sales Coordinator

Dream Hotel Group, LLC – New York, NY | 2019-2020

- Acted as the technical liaison between clients and internal operations teams, translating complex business requirements into detailed technical specifications.
- Leveraged data analysis to troubleshoot operational bottlenecks and optimize resource allocation, directly enhancing system efficiency.

Area Reservations Manager

Dream Hotel Group, LLC – New York, NY | 2017-2019

- Served as the primary technical administrator for multi-platform system integrations (PMS, CRS, RMS), ensuring 99.9% data integrity across critical business applications.
- Managed and mentored a dedicated operations team, overseeing recruitment, training, and performance evaluations.
- Collaborated with executive directors to implement process automation strategies that reduced manual data entry errors by 15%.

Front Office & Revenue Manager (Promoted from Supervisor & Guest Service Agent)

The Grand Summit Hotel – Summit, NJ | 2013-2017

- Rapidly promoted through three roles in two years due to strong technical aptitude and problem-solving capabilities.
- Conducted advanced data analysis on operational metrics to identify systemic patterns and implement evidence-based solutions for process optimization.

Technical Skills & Languages

- **Electronics & Hardware:** PCB Design, Circuit Simulation, Soldering, Test Equipment.
- **Embedded Systems:** Microcontrollers, PLC Programming, Embedded C/C++, I2C/SPI/UART Protocols.
- **Software & IT:** C/C++, Python, Linux, Docker, Git, Bash Scripting, HTML/CSS.
- **Languages:** English (Fluent), Dutch (Fluent), German (Intermediate).
